

## Rubber solutions are our passion

Head office in Pfäffikon (Canton of Zurich, Switzerland)

In-house production

**Compounds develops and produces high-performance rubber compounds, extruded profiles and unvulcanised sheets. More than 100 years of experience as a reputable producer of technically sophisticated and highly innovative products enables us to deliver optimal solutions to our customers.**

Our competence is the result of many decades of experience in the development and production of rubber compounds. The constant availability of raw materials and our high production capacity has enabled us to establish joint added-value partnerships with our customers. A modern environmental energy concept ensures eco-friendly production of top-quality compounds. Compounds core products: worldwide certified drinking water-approved EPDM compounds, EN 45545-2-certified flame retardant compounds, compounds for use in the food sector, unvulcanized films, vulcanized special profiles and ready-made seals.

### Facts & Figures

Turnover	CHF 20 million
Employees	55
Markets	Seals and valves production, fittings, instruments, plant engineering, public transport, building industry, fire-endangered equipment and cabinets, apparatus and mechanical engineering and many more
Products	Own compounds such as Aquaflex for the drinking water sector, DragonFlex for the fire protection field, FoodFlex for the food sector, mill-mixed compounds, compounds for diamond saw wires, specific customer compounds, unvulcanized rollerhead films and sheets, extruded and steam-vulcanized special profiles, ready-made (inflatable) seals.
Established/with POLYGENA	2007/2007
