

Successful solutions within a short time

Head office in Pfäffikon (Canton of Zurich, Switzerland)

In-house production and assembly

Development, manufacture and sales of standard and custom designs for gear components, sprockets, worm and bevel gears, custom gears and other drive system components.

As a specialist in the field, Nozag's core competence covers the development, manufacture and sales of drive system solutions ranging from standard components on stock from our extensive product portfolio to custom modifications – possible at short notice – or drive systems and components developed fully to your specifications. Whatever your requirements, you receive the best drive solution in Swiss quality. Nozag is represented in the German market by a subsidiary and in many other industrialized countries by renowned sales partners.
