

## System partner for precision mechanics

Site in Altstätten and Pfäffikon (ZH)

High precision machined parts

**From the prototype, through the preproduction run, up to the serial product – PWB manufactures customized subassemblies as well as turned and milled precision parts out of aluminum or stainless steel. Our services range from engineering, procurement, manufacturing, measuring and cleaning up to assembly and logistics.**

Added value is at the heart of our services range. As a full-range supplier, we consistently extended our competencies and thus became a system partner for our customers from different industries.

Our qualified professionals know how to use state-of-the-art plant equipment to manage perfectly all processes for mechanical components and complete subassemblies, whatever their size or complexity. You concentrate on your core activities, we do the rest. Our professional expertise, our high quality awareness and our fast communication channels will support you for the safe implementation of your industrialization project.

### Facts & Figures

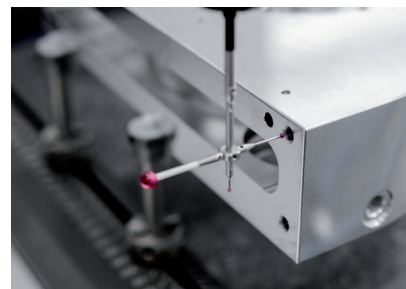

Turnover	CHF 25 million
Employees	80
Markets	Semiconducto, optics, mechanical and plant engineering, Medical, Defence, Automotive, New Energies
Products	manufacturing and assembly of customer-specific subassemblies and precision parts, guiding and locking units for pneumatic and hydraulic applications
Established/with POLYGENA	1981/2001
