

# Leading in rubber spring and damping systems

Headquarters in Hunzenschwil

**ROSTA is the world's leading manufacturer of rubber spring and damping systems. Since 1944, their consistent customer-centric approach has had top priority and contributes significantly to the sustained success of the company.**

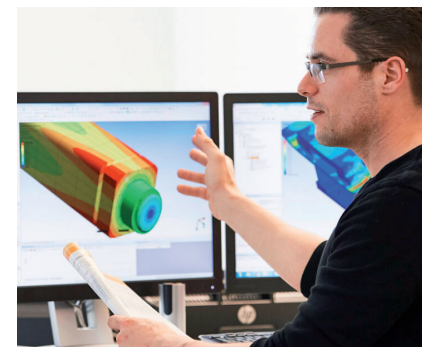

ROSTA solutions are simple, smart and durable, providing customers with increased efficiency and productivity. Their products offer many advantages: a lower total cost of ownership of the customers machinery, custom engineering services, digital monitoring services and sensorics for Industry 4.0 applications. Combined with best-in-class after-sales service and a global reach, this ensures continuous added value in a large variety of industry sectors, ranging from machinery construction, mining, agricultural machinery, material handling to playground applications. ROSTA elements are truly versatile. At ROSTA, customer success is their goal.
